

Farmer's Hive Installation Guide

Step 1: Center the device in the area you are monitoring.

- Install the device in the upright position ☝.
- Recommended at eye height & above the plants.
- **Do not sit in water.** Notice the **red** air vent on the left side.

Step 2: If your device includes a soil moisture/temperature probe, position it in the desired monitoring area of the soil.

Step 3: Connect device to the power source. (Standard electrical outlet)

Step 4: Register Farmer's Hive device at console.farmershive.com/activate with activation code inside this package.

Step 5: Go to farmershive.com and click the Log In button to access the dashboard and view the real time data.

Step 6: Go to "Get Started" to learn about your dashboard.

- Manage Min/Max measurement thresholds.
- Manage contacts for the alert notifications.
